ESTIMATING SERVICE CELEBRATES 3RD BIRTHDAY AND BREAKS NEW GROUND

Pro Estimating Services is celebrating its 3rd birthday this spring. The estimating service started in 2014, its prime focus was, and still is to be a simple to use service, that is cost effective and offers more professional reports than any other service can provide to its clients – the builder or the self-builder. Along with builder merchants including Jewson's using the UK's leading estimating software (Easy Price Pro), made this possible. And today, 3 years on, the company has gone from strength to strength, with thousands of regular users in the UK.

Pro Estimating Services delivers a high quality service that is not a general broad brush estimating services

but has unique systems to price on how your own company price, with quick turnaround (standard 5-7 days) and express options including 72 hour and 48 hour options. This estimating service is renowned for saving builders time at a fraction of the cost that their own time is valued at. A basic set of reports for an extension will cost from £73, whereas most builders will spend 6-8 hours pricing a job (at £25 per hour that is £200). Not only that the additional reports that are available when using this service, are proven to win more work due to their professionalism. It is little wonder why the company receives so many referrals and great reviews.

To try out the service, simply

email your plans to info@pes.ltd and receive a quote showing how much it will cost to price the works. Once you accept the quote, a simple form is sent to you. This optional form enables you to enter your company labour rates, mark-up's and any other details that may not be covered in the plans, the estimator can then use this information to prepare your estimate so it will be accurate to your business's needs.

more work

Rated
4.9*

Cut time spent
estimating by 80%

Easy Price Pro was first developed over 30 years ago and has progressed with the latest building methods and computer technology ever since. Our main focus is ease of use. The software is laid out in the order of the build. It is logical. The different sections integrate with one another to help do the thinking for you. It prices a 4 bedroom house in 45 minutes and extension in 25 minutes **including full written quotation, summaries for each section, material order sheets, bill of quantities, work schedules, payment schedules and more**

ESTIMATING BUILDING COSTS?

FACT: ACCURATELY ESTIMATING BUILDING COSTS DOESN'T HAVE TO BE DIFFICULT, TIME CONSUMING OR TRICKY.

There are some very straight forward ways that will enable you to get this often tiresome job done, dusted and off your desk. Better still both of the methods outlined below are accurate fast and can assist you when it comes to winning that job.

Option 1: Estimating Software - Easy Price Pro have a complete range of estimating programs that quickly and accurately calculate all the plant material, labour and hours for all types of building work and trade specific tasks. Can your current estimating system accurately price a complete extension with a full set of reports including a written quotation in about an hour? Easy Price Pro's New Houses & Extensions Plus program can.

Easy Price Pro programs are designed by a builder,

making them practical, logical and realistic. The pricing sheet is laid out in the order of a build, so the learning curve is short. Their intuitive nature means nothing is forgotten, giving you peace of mind, but you are always in control; you can see how the program is working things out and fine tune it to your preferences if required. At the click of a button you can generate a complete set of job winning reports including payment & work schedules, summaries, material lists and a written quote. Clients can't help but be impressed and you will have a set of job management reports to smoothly run the build.

Contact Easy Price Pro today for more info or a free live demo. Call 03333 321502, email info@easypricepro.com or visit www.easypricepro.com

Option 2: Estimating Services - If you don't want to do the estimating yourself or if you just want a back-up Pro Estimating Services can help. All types of work can be priced including new builds, extensions, refurbishment, alterations and conversions.

This accurate affordable service provides a complete job cost and full set of reports for you and your client. With quick turnarounds and next day delivery options available just send in your plans and Pro Estimating Services will take care of the rest.

- ☒ Greater accuracy = profitable work

Valuable Time Spent Estimating With Software vs. Without Software

Making the most of your time and money

Do you know what building materials you need on site next Tuesday?

Find out how builders have become more efficient using estimating software.

Organise a free demo by contacting Easy Price Pro:

We all know what a nuisance it can be when you're on site and get to a point where you can't carry on until you've got a certain material. How many times have you wasted time and money by having the job paused while Joe runs off for some batten whilst the rest of you are standing around with little to do? Making the most of the time you and your men spend on site might seem like a fantasy. Often dream about an efficiently run site? With Easy Price Pro's estimating software, the Bill of Quantities is just one of the countless benefits you'll have at the click of a button. All automatic.

It is little wonder why existing customers refer to it as the 'best money spent for the business.'
