Pivot doors

Bespoke Solutions

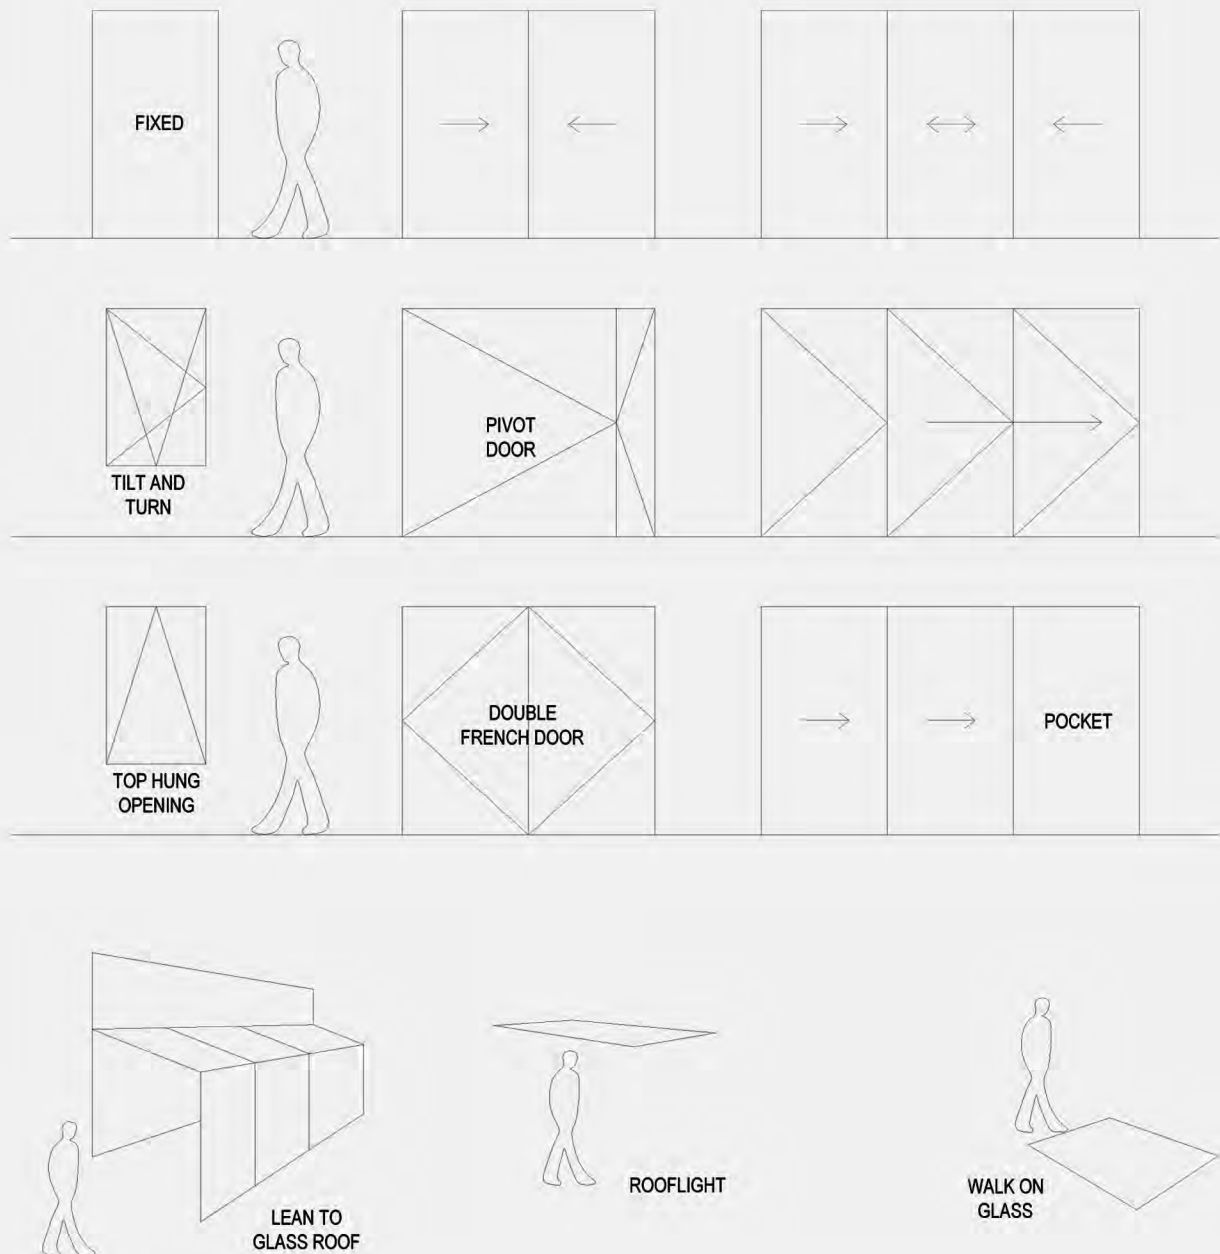

At Slimline, all our glazing systems are using aluminium as principal material for frames, which grant them the natural and essential resistance for construction.

Aluminium is highly recyclable, renowned for its lightness, its durability, its ease of maintenance, and it also contributes to the high performance of our Systems due to its resistance to fire, to UV rays, and thanks to its low conductivity.

## OUR PRODUCTS

*Come up with all our systems on our website  
[www.slimlinealuminium.co.uk](http://www.slimlinealuminium.co.uk)*

*or get in contact with our sales team now!  
0203 876 0958*

We're always glad to advise about all our glazing systems and keen to exchange with our clients on their projects and wishes.

We settled in Surbiton, South West London, where we are displaying for you all our major systems within an airy showroom and a welcoming atmosphere.

## OUR SERVICES

- A showroom to come up with our major frameless systems
- A sales team to provide you with relevant information and first estimates
- Live advices on design and technics with our in house project managers
- An installation department to follow up on the manufacture and fitting process
- An installation team ready to come on site
- Site surveys, lifting service

*Come and meet the team in our Showroom!!*

*We're open Monday to Friday from 9am to 6pm and by appointment on Saturday*

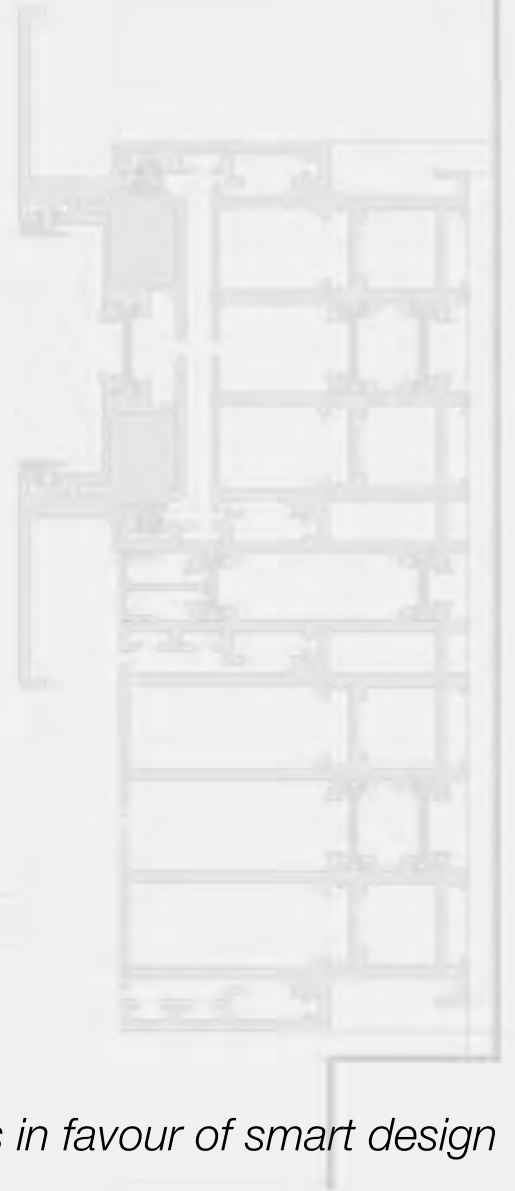

*275-277 Ewell Road, Surbiton, KT6 7AB*
